ES Dove, *Regulatory Stewardship of Health Research: Navigating Participant Protection and Research Promotion* (2020). [View book](#)

C McMillan, *The Human Embryo In Vitro: Breaking the Legal Stalemate* (2021). [View book](#)

The Cambridge Handbook of Health Research Regulation:

The first ever interdisciplinary handbook in the field, this vital resource offers wide-ranging analysis of health research regulation. The chapters confront gaps between documented law and research in practice, and draw on legal, ethical and social theories about what counts as robust research regulation to make recommendations for future directions.

This title is also available as **Open Access** on Cambridge Core.

Testimonial:

“The Health Research Authority has been involved with and greatly interested in the Liminal Spaces project from the beginning. Our participation in this project has helped us to reflect on how we facilitate ethical research, and underlines how essential it is to engage with academic projects if we are to ensure that our processes and policies are informed by the latest thinking.”

Clive Collett
Ethics Policy Manager, Health Research Authority
